

## VITAMIN C IONIC HAND HELD SHOWER FILTER

**SKU: KK-TT-16B-1**

The Vitamin C Ionic Hand Held Shower Filter easily attaches to your existing shower hose and utilises the power of Vitamin C and three stages of water filter balls to remove chloramine, chlorine, scale and a multitude of other impurities. Whilst creating an invigorating and healthy shower experience.

### VITAMIN C BLOCK

Ascorbic Acid (Vitamin C) is known to be extremely effective at neutralising Chloramines and Chlorine from water supplies. Not only does it combat these chemicals successfully but Vitamin C is known for its ability to stop Skin Aging.

### NEGATIVE ION TOURMALINE ALKALINE BALLS

Negative Ions are known to have amazing beneficial properties when it comes to health. They can increase flow of oxygen to the brain and can make you feel instantly refreshed. Alkaline water also provides some amazing benefits to the human body as well, including anti-aging properties and the ability to hydrate skin and detoxifying properties.

### FIR CERAMIC BALLS

Our Far-infrared Mineral Ceramic Balls combine the health benefits of far-infrared molecules with the amazing filtering properties of ceramic. They filter out nasties including the removal of leads, chromium and other heavy metals and help to make water feel softer. They act to kill bacteria's and absorb impurities in water supplies.

### ZEOLITE STONE BALLS

Zeolite has been known for centuries to provide amazing water filtering properties. It can effectively remove heavy metals and help to soften water by removing calcium and magnesium ions.

## INSTALLATION

## HOW TO REPLACE FILTER BALLS AND MAINTAIN THE SHOWER HEAD

Because of the unique properties of this shower head that increases the pressure and flow of shower water, if you live in a hard water area, you may need to clean the stainless-steel face of the shower head more often. Here are some instructions on how to do that and also how to replace the filter balls.

- **To replace the Vitamin C Block:** Remove the face of the shower head by twisting the ribbed chrome shower head face anti-clockwise. Remove the old block and put in the new block. Remember to take off the sticker that says, "Open" so that water will flow through the block. Clean the face as mentioned below before putting it back on.
- **To replace the filter balls:** Take the shower head in both hands and twist the bottom half of the shower head in an anti-clockwise direction. This will separate the two halves of the shower head. You can now access the filter balls in the bottom half and top half of the shower head, just remove them and put in your new ones.
- **To clean the shower head face:** Remove the face of the shower head by twisting the ribbed chrome shower head face anti-clockwise. Once this is off you can easily access the stainless-steel shower face plate. Give that a good clean and put it back in the way you took it off.
